Visual Testing

Why attend this course?

Designed to provide a full appreciation of the methods and practices of visual testing. A high level of theoretical and practical content is offered within these courses in preparation for either PCN Level 1 or 2 examinations. The courses meet the training hour requirements as specified in the relevant PCN documentation.

Course content

- Definitions
- Vision
- Lighting
- Environmental factors, direct and indirect methods of visual assessment
- Visual inspection equipment
- Surface conditions
- Inspection and testing criteria
- The reporting of results
- Codes and standards
- Product technology (welds, castings, wrought), in-service and secondary process defects

Special note: Candidates attempting a PCN examination must meet the PCN/GEN requirements. This course can be used for ASNT certification routes.

Validated by BINDT and recognised by PCN
